

TITLE OF THE PROJECT

Submitted to the
Department of Master of Computer Applications in partial fulfilment of the
requirements for the Mini Project in

Generative AI and Prompt Engineering Laboratory

24MCAAD5

by

**DEPARTMENT OF MASTER OF COMPUTER
APPLICATIONS**

CERTIFICATE

This is to certify that the project entitled “**Project Title**” is carried out by **Student Name - USN** student of 3rd semester, in partial fulfillment for the Mini Project in Generative AI and Prompt Engineering Laboratory - 24MCAAD5, during the academic year 2025-2026.

ACKNOWLEDGEMENT

With deep sense of gratitude, I am thankful to our Respected HoD, **Dr. S Ajitha** for her pillared support and encouragement. I would like to convey my heartfelt thanks to my Project Guide **Guide name**, Department of Master of Computer Applications, for giving me an opportunity to embark upon this topic and for her/his constant encouragement.

It gives me great pleasure to acknowledge the contribution of all people who helped me directly or indirectly realize it. First I would like to acknowledge the love and tremendous sacrifices that my Parents made to ensure that I always get an excellent education. For this and much more, I am forever in their debt.

I am thankful to all my friends for their moral and material support throughout the course of my project. Finally, I would like to thank all the Teaching and Non-Teaching Staff of Department of Master of Computer Applications for their assistance during various stages of my project work.

Student Name

Table of Contents

1. Abstract	1
2. Introduction	2
3. Literature Survey	3
4. Problem Statement	4
5. Proposed System/Methodology.....	5
6. Implementation Details	6
7. Result	7
8. Future Enhancement	8
9. Conclusion	9
10. References	10

1. Abstract

2. Introduction

Purpose: Explain *why* this project is needed.

Include:

Background of the problem

Importance of the problem

Existing issues/limitations

Objective of the project

3.

3. Literature Survey

Include:

- 4–6 existing papers or systems
- What they did
- What limitation exists

Format:

- Author name
- Technique used
- Limitation

4.

Problem Statement

5. Proposed System / Methodology

5.1 System Architecture

- Block diagram (can be added as figure)
- Explain each block briefly

5.2 Data Collection

- Dataset source (Kaggle, UCI, API, self-collected)
- Number of records
- Data attributes

5.3 Tools & Technologies Used

- Programming language (Python, Java, etc.)
- Libraries (Pandas, NumPy, TensorFlow, etc.)
- APIs used
- IDE / Platform

5.4 Model / Algorithm Used

(Only if model-based)

- Algorithm name
- Why it was chosen
- Working principle (simple explanation)

6. Implementation Details

Explain how the project was built

Include:

- Data preprocessing
- API integration steps
- Model training steps
- Workflow

Use diagrams or flowcharts if possible

7. Results and Discussion

Include:

- Output screenshots
- Accuracy / performance metrics
- Graphs / tables
- Comparison with existing systems

Example metrics:

- Accuracy
- Precision
- Response time
- API success rate

8. Applications of the System

Example:

- Educational institutions
- Healthcare
- E-commerce
- Smart systems

9. Advantages and Limitations

Advantages:

- Fast processing
- Improved accuracy
- User-friendly

Limitations:

- Depends on data quality
- API rate limits
- Requires internet

10. Future Enhancements

Example:

- Use deep learning models
- Add real-time data
- Improve UI
- Deploy on cloud

11. Conclusion

Summarize:

- What was implemented
- What was achieved

- Overall impact

12. References

(IEEE or APA format)
